

Christian Bartle

Profile

My academic path began in engineering and robotics, where I built a strong foundation in programming, systems thinking, and applied problem-solving, before transitioning fully into software development.

Education

Bachelor of Science in Computer Science, California State University Northridge (CSUN), Northridge

JAN 2025 - PRESENT

GPA: 4.0

Pierce College, Woodland Hills

FEB 2024 - DEC 2025

- Completed transfer coursework in preparation for transfer to CSUN
- Coursework included college-level English composition, public speaking, U.S. history, and political science
- GPA: 4.0 (all A grades)

Mechatronics Engineering, UTEC - University of Engineering and Technology, Lima

MAR 2017 - DEC 2021

- Completed rigorous coursework in engineering, robotics, and applied mathematics
- Developed strong foundations in programming, systems thinking, and problem-solving
- Completed additional programming coursework in C++ and Python
- Selected as Peer Mentor for Materials Science; supported academically at-risk students

Projects

Automated Temperature & Water Level Control System

- Designed and prototyped an automated water agitation system with temperature and level control
- Implemented control logic using microcontrollers and sensor feedback
- Integrated hardware and software components to achieve reliable autonomous operation

Volunteer

UTEC Educational Startup, Lima

JAN 2018 - DEC 2018

Taught introductory programming concepts to children and adolescents over two semesters.
